Scalewatcher®

Marine

Shipping Companies spend a great deal of money each year in time, labour and chemicals to clean calorifiers, pipelines and water-fed equipment encrusted with limescale. The new, innovative and environmentally friendly *Scalewatcher Marine* Electronic Descaling System provides the simple solution to hard water problems. *Scalewatcher Marine* has also proved effective in drastically reducing the scale build-up in desalination plants.

Easily fitted and requiring no plumbing, chemicals or maintenance.

Scalewatcher® Marine will:

- Remove scale from pipework
- Remove scale from calorifiers
- Reduce the scale in desalination plants
- Help maintain a constant water pressure
- Increase the life of capital equipment
- Reduce scale in water-fed galley equipment
- Reduce limescale build-up from around baths, basins & sinks
- Combat scale build-up in shower heads
- Reduce cleaning costs, chemicals & labour
- Provide a short term payback
